

Annual report 2020

Content

Foreword	4
About company	7
Company history	9
Projects of 2020	10

Ladies and gentlemen,

The past year was undoubtedly marked by a global pandemic crisis that affected the whole of society, and the manufacturing sector was no exception. Throughout the year, we had to adapt flexibly to new challenges and eliminate the impact on business processes and our employees as much as possible. We would like to thank all our employees for their commitment.

Despite these unusual circumstances, we managed to complete all planned investment projects. The most significant event was the completion of the new production hall. This hall was equipped with new production technologies, mainly focused on machining operations, which increase the capacity and quality of production processes.

Also this year, we were very successful in expanding our cooperation with both current and new customers. We are very pleased, for example, with the prospective development of our business relationship with the company Trumpf. One of our main goals for the coming months is to expand our welding capacity, which will also support the quality of our welding processes.

We thank all customers and business partners for their cooperation, which has made it possible to maintain the positive development trend of the company and achieve good results in 2020.

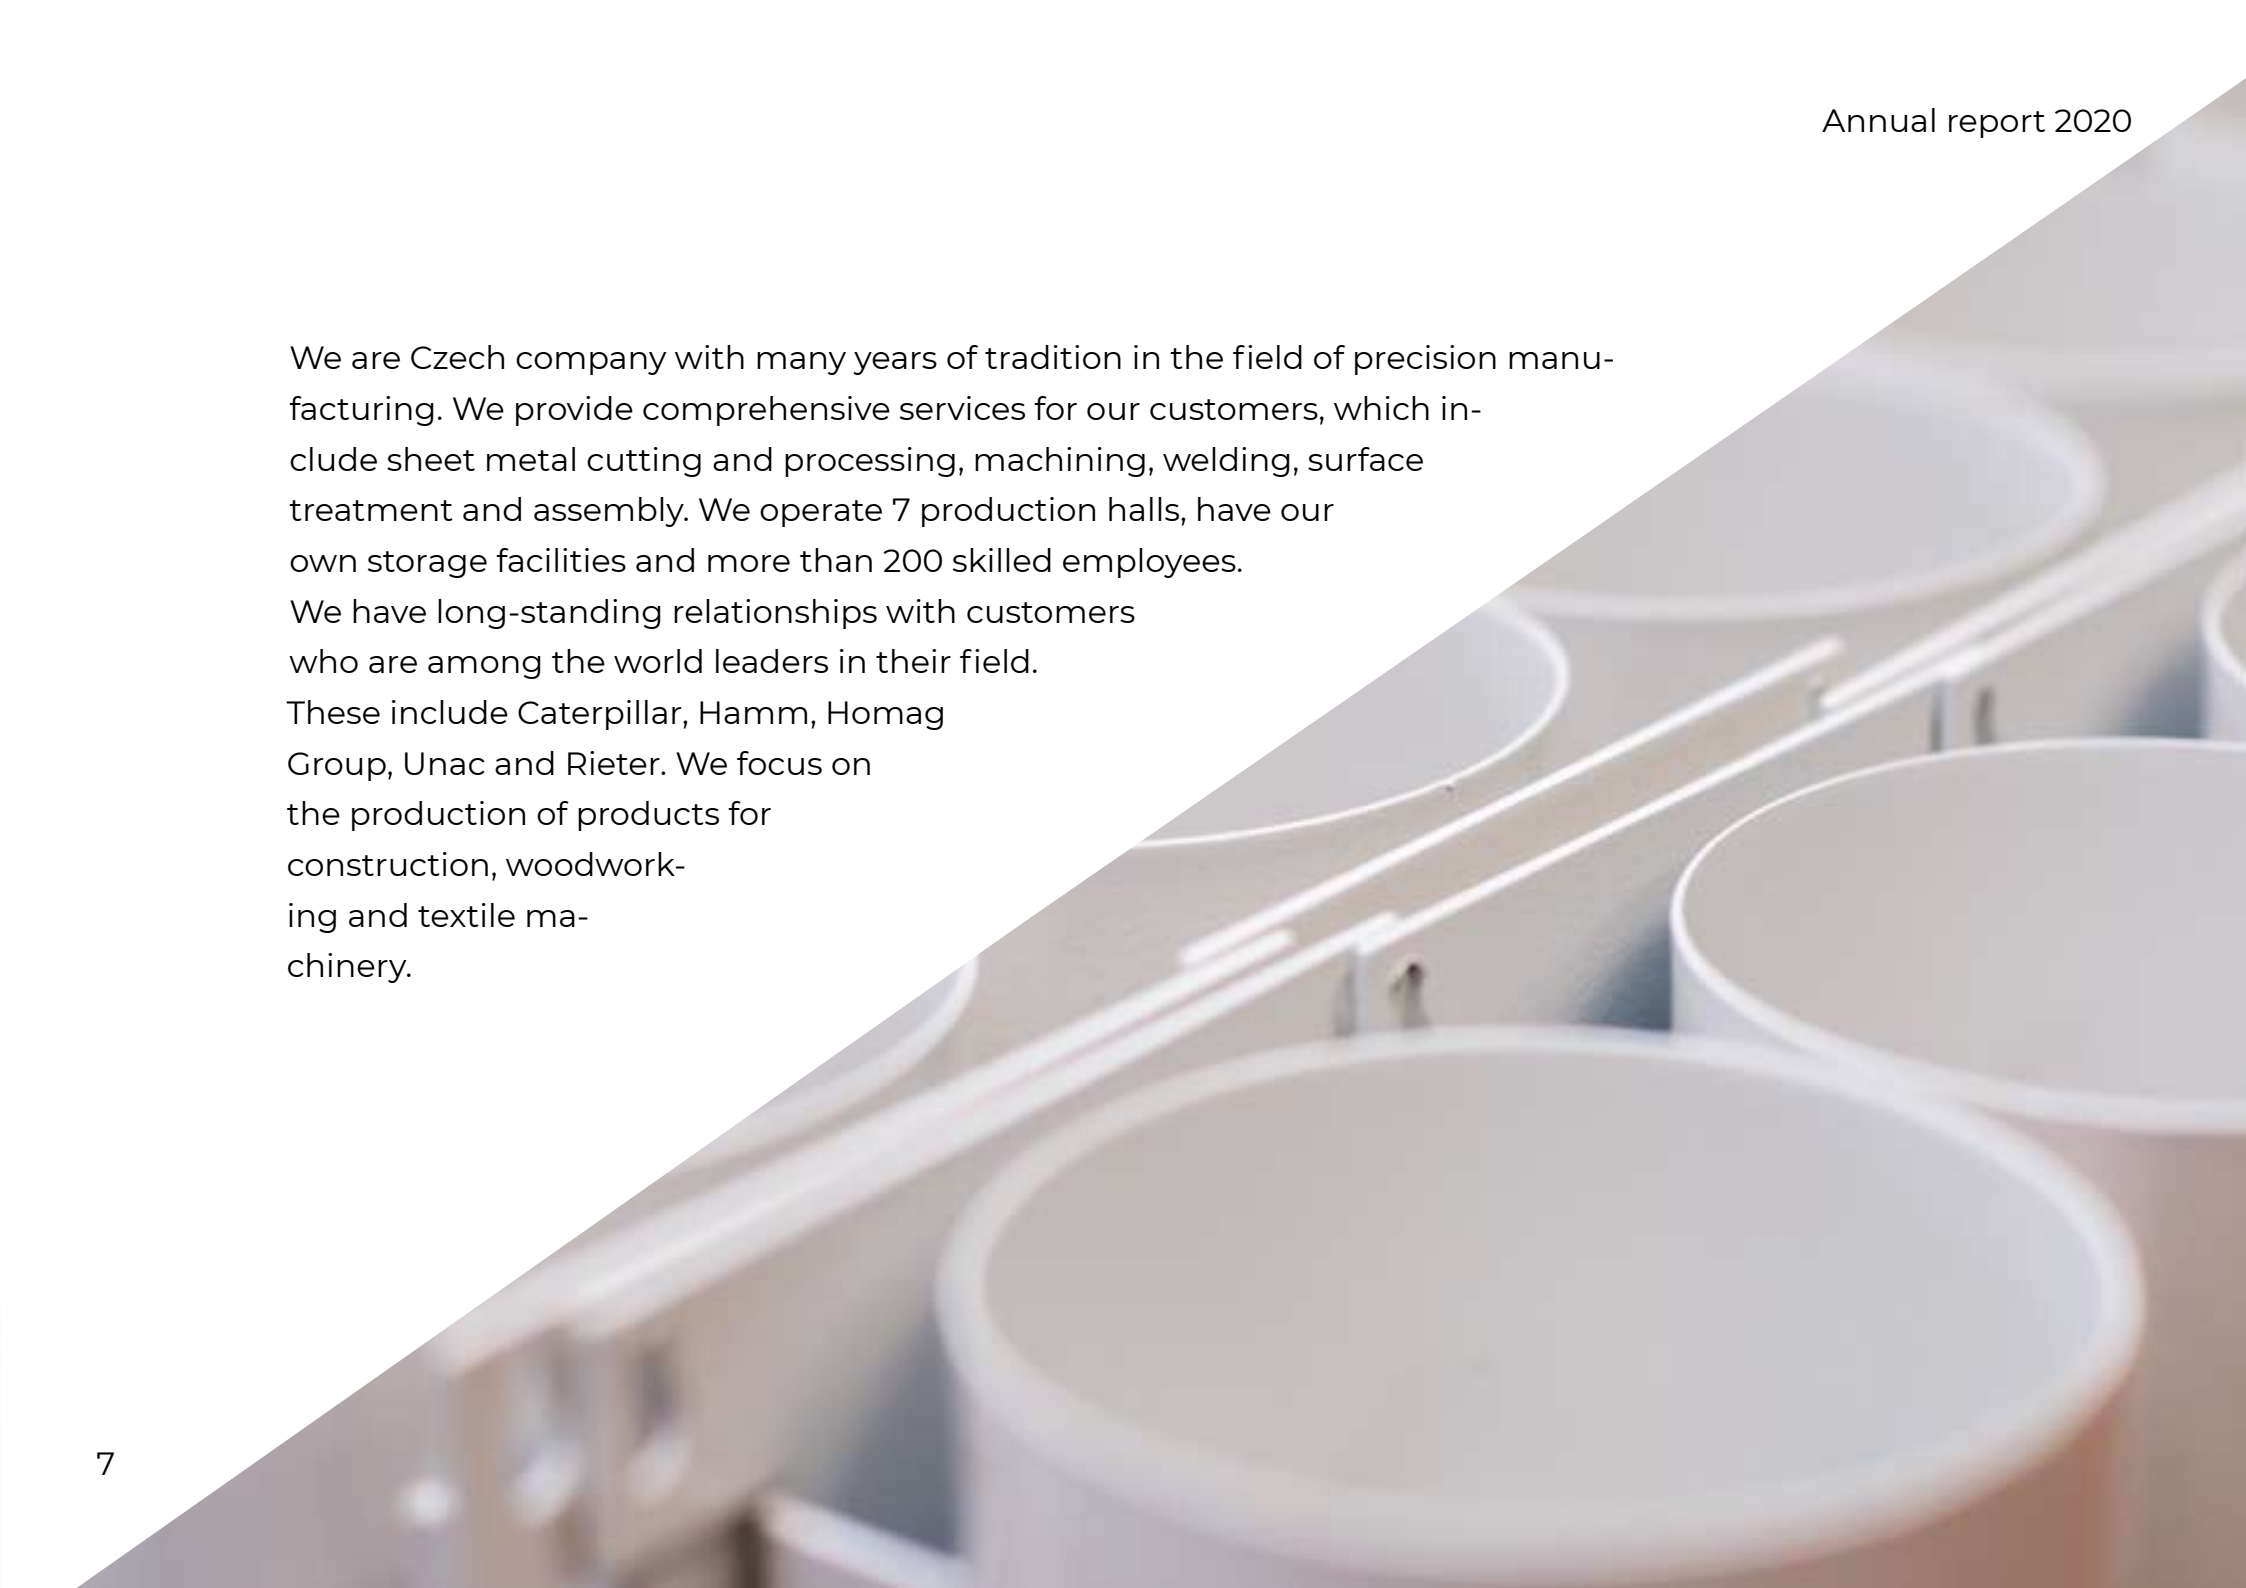

A handwritten signature in black ink, appearing to read 'Kotrbová'.

Ing. Šárka Kotrbová
Managing Director

ABOUT COMPANY

We are Czech company with many years of tradition in the field of precision manufacturing. We provide comprehensive services for our customers, which include sheet metal cutting and processing, machining, welding, surface treatment and assembly. We operate 7 production halls, have our own storage facilities and more than 200 skilled employees.

We have long-standing relationships with customers who are among the world leaders in their field.

These include Caterpillar, Hamm, Homag Group, Unac and Rieter. We focus on the production of products for construction, woodworking and textile machinery.

COMPANY HISTORY

1952 The company's history dates back to the middle of the 20th century, when it was part of a national concern producing textile machinery that was exported all over the world	2008 Major expansion of cooperation with customers from the construction industry (Caterpillar and Hamm) and the woodworking industry (Homag Group)	2013 New 800 m² production hall for final assembly and expedition	2015 A 'CPS' program led by a team of industrial engineers from Caterpillar focused on lean, quality improvement and business process optimization	2020 Construction of a new hall for machining with completely modernised technological equipment
1993 Dissolution of the state enterprise Elitex s.p. Privatisation of Elitex Nepomuk	2009 New 1500 m² welding hall for 20 welding workplaces	2013 New warehouse for sheet metal material and in-process storage	2017 Complete reconstruction of a modern automatic painting line	2020 Reconstruction of the production hall to expand welding capacity

2020 PROJECTS

Doosan Puma GT

The company purchased a Doosan Puma GT high-precision horizontal lathe. The lathe has a 600 mm over bed diameter, a maximum turning diameter of 390 mm, a maximum turning length of 562 mm, 4500 rpm and a tool count of 12 tools in the automatic tool head.

New production hall

The construction of a new shipping and production hall was completed in 2020. This hall has an area of 1000 m2 and is fully equipped with modern machining machines.
